

# THERE ARE MORE REASONS THAN EVER TO CHOOSE LUXAIRE WHEN YOU THINK WITH YOUR HEAD.

## 1 MAXIMUM QUALITY.

## 2 MAXIMUM COMFORT.

## 3 MAXIMUM VALUE.

Whether you're looking for an air conditioner, furnace or a complete heating and cooling solution, your Luxaire dealer can evaluate your home's size, age, number of rooms, regional climate and utility costs to select the absolute best system for your home and your budget that delivers ultimate comfort and efficient performance, and is precisely designed to work best for your home or building.

## 6 WE'RE LEANER AND GREENER.

Green is good for your wallet too. One of our latest innovations is Microchannel coil technology that not only improves efficiency but also enables each unit to operate with less refrigerant, less space and less weight. The smaller footprint, along with other easy-access features enable simpler installation, that can mean lower cost.

## 7 YOU'LL NEVER BE LEFT OUT IN THE COLD.

No need to worry about buying a system that comes up short when a part or support is needed. Luxaire is backed by the Northeast's largest inventory and most extensive delivery capability. The Luxaire installers have fully accredited qualifications, the most current training, and years of experience. They're the smart choice for homeowners looking to make a sound investment.

Your Luxaire Dealer is your neighbor – a real part of the community and is committed to giving you superior service and support. He will not install a system just to make a sale, leaving you with equipment that can't really do the job on days you really need it to perform. He can help homeowners looking to make a sound investment.

## 4 WE COME FROM A GOOD FAMILY.

Luxaire products are made in America. Our roots include building special heating equipment for the U.S. Army and developing the residential air conditioning market as a part of Westinghouse. Our parent company is Johnson Controls, one of the world's foremost technology-driven companies.

## 5 INNOVATIVE TECHNOLOGY THAT IS PLAIN TO SEE, EVEN IF YOU'RE NOT AN ENGINEER.

For example, the Acclimate™ series is designed with a reliable compressor technology with fewer moving parts for greater efficiency and comfort. The AL8B model is equipped with two-stage compressor technology that operates at two levels of performance. A second maximum cooling stage to handle the hottest days. And, a first stage specifically designed to cool your home more efficiently, with less operating noise and with better comfort during non-peak times.

### Durability is a hallmark of Luxaire air conditioners and heat pumps, even in the harshest environments.

Only quality materials like heavy, galvanized steel are used for the cabinets. A powder-paint finish is also applied. The compressor is specially protected from high operating temperatures and pressures. All coils are constructed from copper tubing and aluminum fins. The permanently lubricated, long-life fan motors need no maintenance.

Its unique "water-shed" cabinet design provides additional protection against corrosive weather conditions.

## 8 HIGH EFFICIENCY JUST GOT HIGHER.

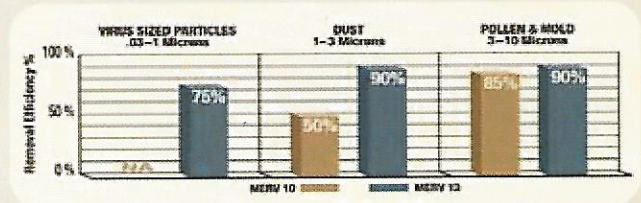

Acclimate Modulating Furnaces are as much as 60% more efficient than those systems manufactured as little as ten years ago. If you are concerned about utility bills or are faced with an expensive repair, you may want to consider replacing your system. For every class and capacity, Luxaire offers a superior performing model.

Luxaire is the only manufacturer that can claim every high efficiency furnace model operates at 95.5% or higher efficiency. They're compact, as small as an industry leading 33" tall. Features such as 2 piece blowers make installation quicker and easier. **The LP9C for example, has been rated a Best Buy by Consumer's Digest.**

## 11 YOU'LL PREFER CLEANER AIR.

This fact about air quality might be a surprise to you: The U.S. Environmental Protection Agency found that indoor air could actually be more polluted than outdoor air. You may be experiencing indoor air pollution without even knowing it. Luxaire offers an array of choices designed to ventilate stale indoor air, zap airborne germs, trap airborne particles and moisturize parched air.

The EPA has just awarded select Luxaire Acclimate systems it's highest Energy Star designation.

## 9 EQUIPMENT SO QUIET, YOU MAY NEVER NOTICE IT RUNNING.

The Acclimate SilentDrive™ System features:

- Fully enclosed compressor section and advanced composite material to dampen sound.
- Advanced fan design for smoother air flow and reduced noise.
- Two-stage compressor technology that provides up to 4x quieter and 60% more efficiency. For every 3 dB quieter, sound power is reduced 50%!

## 13 ADDED PROTECTION & PEACE OF MIND.

Enjoy the simplicity and precision of the Touch screen to monitor system activity with the Luxaire® Acclimate™ Residential Communicating Control.

## 14 EASY FINANCING. Talk to your Luxaire dealer.

## 10 YOU WON'T FIND A BETTER WARRANTY.

You're assured of superior performance year in and year out. Luxaire backs every R410A system with one of the best limited warranties you'll find: 10 years on compressors and a 10-year limited warranty on parts. Acclimate systems are also eligible for a **Lifetime Compressor Warranty**.

It gets even better if you opt for the **Luxaire® Performance Promise™ Extended Protection Plan**. It will ensure there will be no expensive repair costs:

- No limit on the number of repairs
- Provides up to 10 years of total coverage
- protects you against rising repair costs
- Can be transferred to a new owner if you sell your home
- One-time payment at time of purchase

Ask your Luxaire dealer for details.
